

# iOS Developer

Join India's leading destination for English learning

## About enguru

Enguru is India's leading destination for online learning English, with over 4 crore learners who have used our products. enguru caters to multiple audiences, including adult and children learners looking to learn English through live group and/or personal classes.

## About the Role

You will have end-to-end ownership in helping to launch the first iOS app in the enguru product suite. You will work closely with back-end engineers, product managers and graphic designers to build different layers of the infrastructure. You will be responsible for discovering, evaluating and implementing new technologies in your process to optimise the development efficiency.

## Desired Experience & Skillsets

- Experience in publishing iOS apps in the app store, and worked on the development of iOS apps and their integration with back-end services
- Proficient in offline storage database systems and experience with third-party libraries (including custom libraries)
- Strong debugging, troubleshooting, performance tuning and optimisation skills
- Knowledge of asynchronous and multithreading patterns
- Excellent computer science fundamentals, including databases, OOP, data structure and algorithm knowledge
- Experience building fluid custom interfaces for a variety of screens, backed with a strong understanding of Apple design principles and interface guidelines

## Proficiency with tools such as

SWIFT

XCode

RESTful APIs

AWS API Gateway

SQLite

MySQL
